Bunker Hill Publishing Inc. Hardback. Book Condition: new. BRAND NEW, Seahorses and Seadragons: Mysteries of the Oceans, Catherine Wallis, The seahorse is one of nature's most startling creations. For the ancient Greeks and Romans, who found them washed up on shore after storms, the only explanation for such an astonishing form was a mythological one: these creatures pulled the chariots of Neptune. The seahorse, even to us nowadays, seems out-of-this-world. It is a fish, but has the head of a horse and wears a crown. Its fins move so fast they are almost invisible. It has a tail, but a curly one like a monkey's, and instead of scales a suit of armour plating. Its eyes can swivel monstrously in two different directions at once. In most unfish-like and contrary manner, it swims upright, its progress slow and ponderous. To balance the fact that it can't swim very fast and escape predators, it has perfected the most artful camouflage. There are up to 100 species worldwide, ranging in size from approximately 1/2 " or " to 12" (15 or 20mm to 300mm), with the majority being about 6" (150mm) long. New discoveries are still being made, and the seahorse map is yet to be fully drawn.
