THE DIAGNOSIS OF GLANDERS BY COMPLEMENT FIXATION (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Diagnosis of Glanders by Complement Fixation Sir: I have the honor to transmit herewith a paper entitled The Diagnosis of Glanders by Complement Fixation, by Drs. John R. Mohler and Adolph Eichhorn, of the Pathological Division of this bureau. Since the discovery of the glanders bacillus in 1883 many efforts have been made to find a reliable method of making an early diagnosis of the disease. The mallein test and later the agglutination test have been and are at present in general use, but neither of these is sufficiently reliable to be entirely satisfactory. Sechutz and Schubert, German investigators, recently called attention to the value of complement fixation as affording a more reliable method of diagnosing glanders, and within the past year this method has been carefully studied and tested in the Pathological Division of this bureau. It will be seen from the details given in the accompanying paper that the authors have found the complement fixation test to be highly reliable as a diagnostic agent for glanders, and they present a thorough exposition of the method resulting from their searching experiments, including practical tests in a recent outbreak of glanders at Washington. D. C. In view of the great economic and scientific importance of the subject, and as no work upon this new method has so far been published in the United States, I recommend the immediate publication of the paper in the bulletin series of this bureau, in order that the value of the method and the technique necessary for its application may be made more fully available in this country. About the Publisher Forgotten Books publishes hundreds of thousands of rare...
