Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Excerpt: .high symbolic meaning of the different individual phenomena of nature, particularly in the phases of development of natural objects in relation to the stadia of human development, we find it in the fact that nature and man have their origin in one and the same eternal Being, and that their development takes place in accordance with the same laws, only at different stages. Thus the observation of nature and the observation of man, in comparison and in connection with the facts and phenomena of the general development of humanity, are mutually explanatory, and mutually lead to deeper knowledge the one of the other. A clear insight into the causative and creative relation of the human spirit to its external work leads also to a clear insight into the relation of the causative, creative spirit of God to nature; leads to a knowledge of the manner in which the finite proceeds from the infinite, the material from the spiritual, nature from God. Even man, although externally a finite being, does not always need his arms and hands for the production and outward representation of his work; more frequently his will, his determining look, the breath of his word, create and bring forth. Even man, although externally finite, can bring forth material for his creations, without having recourse to material existences. Whoever wants further proof for this need only pass in review the whole series of developments, conditions, and phenomena, from the least material, innermost thought...
