Excerpt: . . . measurement lab may experience. Each enclosure contains its own precision measurement electronics to avoid unnecessarily long signal path lengths to the data acquisition electronics. These meters are then read remotely via computer into the data acquisition system. 4. 4 Data Acquisition Figure 4. 4. Block diagram of data acquisition system. The basic data acquisition system is depicted in Fig. 4. 4 above. Data acquisition and analysis are automated by means of a desktop computer and customized software. Remote communication with the instruments in each detector enclosure allows a single computer to monitor both instruments (in the transmitted and reflected beam paths) simultaneously. The software allows for independent control of injection time, background measurement, and correction. Data analysis is performed real-time and is intended to allow for user interaction as a time-saving measure. The types of detectors (energy, power, or calorimeter) are selected by the user, and other static elements...
