

## Aspects of Zaiwa Prosody: An Autosegmental Account

By Mark W Wannemacher

Summer Institute of Linguistics, Academic Publications.  
 Paperback. Book Condition: New. Paperback. 172 pages.  
 Dimensions: 8.8in. x 6.0in. x 0.4in. The purpose of this study is to provide a generative and autosegmental phonological analysis of the Zaiwa language with emphasis on prosodic components. This is a preliminary phonology of Zaiwa with a relatively complete treatment of all phonological aspects, concentrating on suprasegmental components. The generative autosegmental framework employed incorporates feature geometry in a manner that provides a view of the interaction of segmentals and suprasegmentals. In particular, the interaction of voice quality, tone, and consonantal features are presented using feature geometry and underspecification in order to differentiate lexical tone from derived tone. It is the authors goal to provide a basis for understanding the processes occurring in Zaiwa phonology and provide helpful insights in understanding similar processes in other Tibeto-Burman languages. Mark Wannemacher has lived in Southeast Asia for eight years, and his research on the Zaiwa language has been conducted over the past six years with speakers from various dialect areas. His research was the basis for his masters thesis at the University of Texas at Arlington. Table of Contents Introduction Previous Studies of Zaiwa Phonology Phonological Prerequisites to the Analysis and Representation of Zaiwa...
