

Fire Fighting; Some Facts and Figures

By Anonymous

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1911 edition. Excerpt: . each coupling if required. The threads of all couplings should be thoroughly cleaned of all dirt or sand and a slight coat of lubricating oil put on them but no oil should be allowed to touch the hose, as it will cause it to become brittle. Cold and frost effects rubber and makes it brittle. That is one of the reasons why more hose bursts in the winter months than at any other time. Hose should not be allowed to remain kinked when charged with water. All hose, pipes, nozzles, siamese or other connections should be examined and tried regularly to see if their threads are in good order and their swivels work easily. Nozzles, pipes, couplings, etc., should not be allowed to fall, as a slight dent in them is liable to render them unfit for use, or in the case of...
